ADDITIONAL INFORMATION

Described in a few words:

-

I wish to build a successful career in IT. I am dedicated and hardworking, and I believe I can bring added value to your team through my determination and creativity. I am seeking an innovative and dynamic environment in which to develop my skills and contribute to project success.

Developer learning process

How I got these skills?

I did most of the projects in html, css and javascript, until I mastered the basics, then I chose React as a framework. When I started making more complex websites, I tested several technologies to see what suits me better.

On my GitHub account, you will find over 40 projects that I have made to improve my web development skills.

=> <https://github.com/ionutdiaconescu>

I've created a presentation portfolio through which I introduce myself and show you some projects.

Hobbies and interests

-

I like to draw pencil portraits to train my patience, imagination, and creative side, while also playing guitar. I enjoy doing sports, reading, and learning new things.
